## GORE-TEX FOOTWEAR. COMFORT AND PROTECTION.

GORE-TEX Footwear provides durable waterproofness and high breathability. This product comfort keeps wearers fully concentrated on their job which increases situational awareness.

**GORE-TEX TOF Footwear** is non insulated for high heat loss. It is ideal for warm weather and combined outdoor/indoor activities.

Benefits:

- Durably waterproof: dry feet
- Highly breathable: sweat out fast
- Non insulated: high heat loss
- Extremely abrasion resistant lining: exceptionally durable
- Quick re-dry: fast re-use
- Protection against exposure to sewage and commonly occurring chemicals\*

\*in accordance with ISO 13994/ASTM F 903 , method C1; commonly occurring chemicals include AFF Fire-fighting foam (3%), sulphuric acid H<sub>2</sub>SO<sub>4</sub> (37%) diesel and caustic soda NaOH (30%)

# FORCES

# GRIP TO PLAY IN ALL CONDITIONS

Contagrip® is more than a sole. It's a system of rubber compound and lug geometry, expertly engineered to optimize grip for each sport, terrain, and weather condition. Wet, dry, loose, hard, or muddy, Contagrip® performs better so athletes can play with confidence.

## GRIP SYSTEM

Every Contagrip® sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications. Each have 3 families of compound and geometry.

## COMPOUND

### DURABILITY FIRST

Tough, long-lasting, ideal for rough surfaces or extra long wear

### ADHESION FIRST

Softer compound provides stickier feel on wet or smooth surfaces like rocks, roots, asphalt, etc.

### WINTER SPECIFIC

Stays soft in cold temperatures.

## GEOMETRY

### FRICION FIRST

More contact with the ground for confidence on flat surfaces, wet or dry

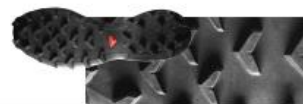

### MIXED

A balance of surface area and multi-directional lugs to provide friction and penetration

### TRACTION FIRST

Deep lugs with large drainage channels to penetrate soft terrain and mud

## CHASSIS TECHNOLOGIE

When you move train and deploy in uneven, varying terrain, having a platform that provides stability and cushioning is critical. Salomon has developed different chassis constructions developed for different terrain and uses, ensuring stability, cushioning, and comfort, while letting you move dynamically.

### 3D CHASSIS

Stability & propulsion  
for mountain terrain

AVAILABLE ON **XA PRO 3D GTX FORCES,**  
**XA FORCES MID GTX®, XA PORCES MID**

### 4D CHASSIS

Foot control & protection  
with active comfort

AVAILABLE ON **QUEST 4D GTX® FORCES 2,**  
**QUEST 4D FORCES 2**

**SALOMON**

# FORCES

## FIT TECHNOLOGIES

When military personnel train and deploy, their feet become flatter and wider the longer they stay out in the field. Combine that with the blisters, calluses and bunions that develop over many miles of training, and it's no surprise that proper fit is universally listed as the most important benefit of a tactical shoe.

### QUICKLACE™

Easy-on, easy-off system for a secure and customized fit.

### SENSIFIT™

Wraps the foot from the midsole to the lace system, providing a stable and precise fit.

**SALOMON**

# FORCES

## AEROTHERM<sup>®</sup> INSULATION

Higher performance insulation with less weight and less bulk. Aerotherm<sup>®</sup> is a high performance insulation technology that resists compression and keeps feet warm up to  $-40^{\circ}\text{C}$  /  $-40^{\circ}\text{F}$ . The lightweight and performance come from Nanotechnology that traps 90% air into the construction. It weighs less, is much thinner, and insulates better than other technologies. Aerotherm<sup>®</sup> is available in our most extreme winter footwear.

aerotherm

**T° COMFORT**

Temperature at which a **static person** will not have cold feet.

$-30^{\circ}\text{C}$   
 $-22^{\circ}\text{F}$

(eg: standing)

**T° LIMIT**

Temperature at which a **low-active person** will not have coldfeet.

$-40^{\circ}\text{C}$   
 $-40^{\circ}\text{F}$

(eg: walking)

**T° EXTREME**

Temperature at which an **active person** will not have coldfeet.

$-78^{\circ}\text{C}$   
 $-109^{\circ}\text{C}$

(eg: running)

# TECHNICAL GLOSSARY

## SOLE

Every Contagrip® sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications.

A high performance EVA foam that provides shock attenuation

## UPPER

SensiFit cradles the foot from the midsole to the lacing system, providing a secure, snug and virtually customized fit all around the foot

Leather

Fabrics are tested against quality standards that are based on scientifically determined metrics that characterize both shaping performance and comfort.

## FIT

Ortholite® insoles provide step-in comfort and enhanced durability, breathability, moisture and odor control using a combination of special PU and rubber

A locking eyelet between the forefoot and ankle eyelets that locks the laces in place, enabling independent and precise adjustment

## CHASSIS

A stable chassis construction that harnesses two different midsole components to provide maximum foot control and active comfort

A low-profile Advanced Chassis, placed between the outsole and midsole, maximizes security, motion control, energy management and push-through protection for a precise, stable and responsive ride.

## LINING

In rain, snow or ice - GORE-TEX® Insulated Comfort is highly insulating with inner lining that protects your feet from the cold and keeps them comfortably warm. The GORE-TEX® membrane delivers durable waterproofness. Your feet stay dryer and warmer.

Waterproof weather protection for active hikers who need a flexible, lightweight waterproof bootie construction

Higher performance insulation with less weight and less bulk. Aerotherm® is a high performance technology that resists compression and keeps feet warm up to -40°C / -40°F

Our patented Quicklace™ one-pull lacing system ensures a secure and customized fit. Easy-on, easy-off.

Tuck the excess lace and the buckle up inside the pocket on the tongue of the shoe.
