SALOMON

WHAT IS OUR

MISSION

Provide the best of innovation and performance outdoor footwear to address the needs of core direct action units and professional requirements of NATO and allied countries.

WHAT IS OUR

VISION

Become the #1 tactical outdoor brand of choice for SOF and dedicated distribution network.

SALOMON FORCES RANGE

Soldiers and public safety professionals need dedicated equipment to operate in hostile environments – and that starts with appropriate footwear. For the past 10 years, the FORCES range of tactical and combat boots has been designed and developed with professional military, law enforcement and first responders in mind. In addition to providing year-round comfort and outstanding traction in changing terrain, footwear for armed forces and law enforcement professionals must be stable, durable and offer total weather protection to complete the mission. Salomon selects materials, features and construction methods that withstand the rigors of daily professional use and provide protection during extreme and extended operations in severe wet weather.

TECHNOLOGIES

GORE-TEX FOOTWEAR

COMFORT & PROTECTION

GORE-TEX® Footwear provides durable waterproofness and high breathability. This membrane enhances comfort keeping the user fully concentrated on their job with increased situational awareness.

GORE-TEX® Extended Comfort Footwear is non insulated for high heat loss. It is ideal for warm weather and combined outdoor/indoor activities. Includes the added protection of a waterproof GTX membrane for extended use in severe wet weather. Contains PFAS chemicals.

BENEFITS

- Durably waterproof : dry feet
- Highly breathable : sweat out fast
- Non insulated : high heat loss
- Extremely abrasion resistant lining : exceptionally durable
- Protection against exposure to sewage and commonly occurring chemicals*

*in accordance with ISO 1399/ASTM 903 , method C1; commonly occurring chemicals include AFF Fire-fighting foam (3%), sulphuric acid H₂SO₄ (37%) diesel and caustic soda NaOH (30%).

CONTAGRIP

GRIP TO WORK IN ALL CONDITIONS

Contagrip® is more than a sole. It's a system of rubber compound and lug geometry expertly engineered to optimize grip for each operation, terrain and weather condition. Wet, dry, loose, hard or muddy, Contagrip® performs better so soldiers and law enforcement personnel can perform with confidence.

GRIP SYSTEM

Every Contagrip® sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications. Each have 3 families of compound and geometry.

Each shoe undergoes intense lab and field testing, against the reference products in the market.

GEOMETRY

FRICION FIRST

More contact with the ground for confidence on flat surfaces, wet or dry.

MIXED

A balance of surface are and multi-directional lugs to provide friction and penetration.

TRACTION FIRST

Deep lugs with large drainage channels to penetrate soft terrain and mud.

COMPOUND

DURABILITY FIRST

Tough, long-lasting, ideal for rough surfaces or extra long wear

CHASSIS TECHNOLOGIES

When you move while training or deployed in uneven, varying terrain, having a platform that provides stability and cushioning is critical. Salomon has developed different chassis constructions developed for different terrain and uses, ensuring stability, cushioning, and comfort, while letting you move dynamically.

3D CHASSIS

Stability & propulsion for mountain terrain.

ALL X ULTRA MODELS

FIT TECHNOLOGIES

When military personnel train and deploy, their feet become flatter and wider the longer they stay out in the field. Combine that with the blisters, calluses and bunions that develop over many miles of training and it's no surprise that proper fit is universally listed as the most important benefit of a tactical shoe.

QUICKLACE™

Easy-on, easy-off system for a secure and customized fit.

SENSIFIT™

Wraps the foot from the midsole to the lace system, providing a stable and precise fit.

TECHNICAL GLOSSARY

SOLE

	Every Contragrip sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications.
	A high performative EVA foam that provides shock attenuation.
	Lightweight, super responsive cushioning. A foam created by combining EVA and Olefin (OBC) to deliver long lasting cushion and bouncy energy return.

CHASSIS

	A stable chassis construction that harnesses two different midsole components to provide maximum foot control and active comfort.
	A low-profile Advanced Chassis, placed between the outside of midsole, maximizes security, motion control, energy management and push-through protection for a precise, stable and responsive ride.
	A lightweight Advanced Chassis, placed between the outside and midsole, maximized motion control, energy management and push-through protection for an efficient, stable and responsive ride.
	activeCHASSIS Definition: A chassis for increased guidance, compromised agility and fluid freedom of movement.

UPPER

	Sensifit cradles the foot from the midsole to the lacing system, providing a secure, snug and virtually customized fit all around the foot.
	Leather.
	Fabrics are tested against quality standards that are based on scientifically determined metrics that characterize both shaping performance and comfort.

FIT

	Ortholite® insoles provide step-in comfort and enhanced durability, breathability, moisture and odor control using a combination of special PU and rubber.
	A locking eyelet between the forefoot and ankle eyelets that locks the laces in place, enabling independent and precise adjustment.
	Our patented Quicklace™ one-pull lacing system ensures a secure and customized fit. Easy-on, easy-off.
	Tuck the excess lace and the buckle up inside the pocket on the tongue of the shoe.

WEATHER PROTECTION

	GORE-TEX Footwear provides durable waterproofness and high breathability. This membrane enhances comfort keeping the user fully concentrated on their job with increased situational awareness. GORE-TEX Extended Comfort Footwear is non insulated for high heat loss. It is ideal for warm weather and combined outdoor/ indoor activities. Includes the added protection of a waterproof GTX membrane for extended use in severe wet weather.
	Higher performance insulation with less weigh and less bulk. Aerotherm® is a high performance technology that resists compression and keeps feet warm up to -40°C / -40°F.
	Salomon's own 3-layer waterproof laminate. Made with a PFC-free membrane sandwiched between 100% recycled fabric and nylon backing.
	Advanced cold-weather insulation that provides an excellent weight-to warmth ratio with small air pockets between the fiber balls. Made from 70% recycled polyester.

TRAINING

A low-angle, close-up shot of a person's legs and feet as they run through a muddy puddle on a dirt path. The person is wearing grey shorts, black socks, and green trail shoes with a prominent tread pattern. The background shows a scenic landscape with mountains and trees under a cloudy sky.

Maintaining peak physical performance for deployment requires versatile footwear to withstand the rigors of modern strength and conditioning programs.

FORCES

TRAINING

SPEEDCROSS 6 FORCES

SPEEDCROSS 6 FORCES

TRAINING

A long-time favorite of tactical athletes and staying true to its legendary roots, the 6th version is lighter with an even more grippy connection to the ground and faster mud evacuation. The FORCES specific version features more room across the forefoot.
